

What is Tedkik?

Tedkik is a **pre-review and assessment portal** that examines papers, theses, and academic projects in depth using advanced analysis engines. Once you upload your document, you receive a comprehensive assessment report across 12 distinct analysis dimensions — from formal structure and argument strength to literature coverage and CONSORT 2025 compliance — all from the perspective of a genuine academic reviewer.

Based on SCI, SSCI, AHCI, and Scopus journal standards, the system reports weaknesses and improvement opportunities in your work with concrete findings and actionable recommendations. Know how ready you are before you submit to a reviewer.

12 ANALYSIS TYPES

Formal Analysis

Language, spelling, punctuation, and style are examined; correction suggestions are offered for expression errors.

References & Citation Analysis

In-text citations and references are checked; corrections aligned with APA, MLA, and Chicago styles are suggested.

Risk Analysis

Critical gaps that may affect academic validity are identified against reviewer criteria.

Argument Analysis

The main thesis and arguments are analyzed within a textual coherence framework; hypothesis consistency is assessed.

Content Analysis

Content gaps are identified from an academic writing standpoint, with cause-effect focused recommendations.

Literature Analysis

The currency and adequacy of the literature is analyzed; source suggestions to deepen the theoretical framework are provided.

Structure & Organization

The logical flow and volume balance of sections are analyzed, with recommendations for structural soundness.

Quality Enhancement Analysis

Strategic elements and advanced writing techniques are recommended for SSCI, SCI, AHCI, and Scopus standards.

Readability Analysis

A readability index is calculated, identifying structures and stylistic errors that weaken fluency.

Blind Review Analysis

Elements that may compromise reviewers' objective judgment or confidentiality are identified, with ethical compliance recommendations.

Thematic Analysis

Components are evaluated against international index standards; a success score and strategic feedback are provided.

CONSORT 2025 Compliance

Technical checks are performed against CONSORT 2025 standards; elements weakening methodological compliance are reported.

HOW IT WORKS

1

Upload Document

Upload your paper, thesis, or project file in DOCX format

2

Select Type & Field

Specify your work's type and academic field to start the analysis

3

System Analyzes

The platform scans the document thoroughly against academic criteria

4

Review Findings

Detailed findings, priority ranking, and improvement suggestions

5

Download Report

Save the professional report in PDF or DOCX format

KEY FEATURES

Real-Time Progress

Track the analysis process live, see percentage progress and time remaining

Multi-Format Reports

Five report templates: Scientific, Classic, Modern, Official, and Data-Driven

Data Privacy

Your documents are stored encrypted and are never shared with third parties

Version Comparison

Compare your revised documents against previous versions to measure progress

QR Verification

Reports include a QR code; scan it to verify authenticity and integrity

Team Collaboration

Invite team members, review and manage analyses together

Comment System

Add comments on findings, discuss with your team, and record resolutions

Highlighted Document

Findings are marked in color on the original document; problematic paragraphs are spotted instantly
